

About the Company

“New and emerging technologies are redefining the way businesses approach the problem. The massive influx of data in the last decades requires enormous computing and storage power to derive powerful insight that can deliver superior customer experience. Netweb from its inception have been focused to understand the painpoints of the industry and come up with innovative bespoke solution.

Over the years, we have developed expertise in the spheres of high-performance computing (HPC), high performance storage (HPS), Servers & Workstations, Cloud Computing, Private 5G, AI/ML and deep learning solutions. Apart from the above-mentioned solutions, we also provide end to end cloud managed services for enterprises with expertise in on-premises Cloud Assessment, Cloud Design Consultancy, Private/Hybrid Cloud Build, Cloud Transformation, Hybrid Cloud Service, and Virtualized Datacentre Infrastructure”.

What You Will Do
